DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-56, 107-114 drawn to method and apparatus for the forming wire section, classified in class 162, subclass 209.
 - II. Claims 57-88, drawn to a method and apparatus for pressing and drying, classified in class 162, subclass 206.
 - III. Claims 89-106, drawn to a method and apparatus for changing the performance of the forming wire section, classified in class 162, subclass 199.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different modes of operation, function and effect
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and recognized divergent subject matter restriction for examination purposes as indicated is proper.
